

AN AGENT FOR CHANGE

ACCIONA contributes to raise social awareness in governments, society and business in the transition towards a sustainable and low-carbon economic model.

“At ACCIONA, we’ve identified carbon pricing as an outstanding tool to boost decarbonization and support the transition to a zero-carbon economy.”

JOSÉ MANUEL ENTRECANALES
DOMECQ, CEO ACCIONA

“The Task Force on Climate-Related Financial Disclosure, TCFD, represents a step beyond in essential progress through the inclusion and monetisation of the impact of climate change in our current and future investments. These recommendations, which are also supported by financial leaders, will lend considerable support to ACCIONA’s pathway towards the implementation of ambitious, effective and incremental targets for enabling the transition to a low carbon economy.”

José Manuel Entrecanales Domecq,
Chairman and Chief Executive Officer, ACCIONA

ACCIONA

A common framework should reflect, at least: binding targets on Member States; indicative paths to achieve final targets; transparent, stable and predictable support systems and market rules; prohibition of retroactivity and other measures against achieving renewable targets; coherence with fiscal policy (environmental taxes); a specific procedure enabling the Commission to verify in advance the effective implementation of the methodology, as well as to resolve potential deviations from the national targets; discrimination against conventional energies (remove fossil fuel subsidies).

Carbon Pricing Corridors can be used by companies, investors and policymakers to help manage climate risk and to actively shift investments to the growing clean economy — ACCIONA will be including them in our own business planning going forward.

José Manuel Entrecanales Domecq
