In 2017, ACCIONA's share price depreciated by 3.79 % despite very positive performance in the first half, when it reached 85.87 euros in June. The share's performance was penalised by a number of factors in the second half, particularly the upswing in the perception of regulatory risk in Spain following government statements about the regulatory review scheduled for 2019, and the trend in the company's working capital in 2017.

CONSOLIDATION OF THE DIVIDEND

In line with business performance in the year, and reflecting the company's strong strategic and financial position, the Board of Directors has proposed that the Shareholders' Meeting approve a dividend of 3 euros per share in 2018, charged to 2017 income, i.e. 4.3 % more than the dividend distributed by ACCIONA in July 2017.

STABLE AND PREDICTABLE EBITDA

In recent years, ACCIONA has been very selective in its asset investment decisions and in bidding for contracts with a large component of stable and secure long-term cash flows. This strategy has enabled it to increase recurring revenues and provide a solid, stable framework of revenues and cash flows going forward, while improving the company's debt profile and leverage.

Through facilities with PPA -Power Purchase Agreement- or regulated power sale price mechanisms, ACCIONA Energy provides EBITDA that is stable over the long term, affected only to a very limited extent by load or resource factors.

ACCIONA Infrastructure also lends considerable stability to Group EBITDA, whether through availability payments in its concession business and end-to-end water management contracts or under long-term services contracts in areas that offer the prospect of stable demand in the future.

EBITDA from long-term assets and contracts

CURRENT AND PROJECTED DEBT

Pro-active debt management and the reduction of financial costs strengthen the company's balance sheet and protect liquidity, making it possible to generate cash flow over the long term and providing a very stable foundation from which to undertake future investments.

Net interest-bearing debt increased by 1.8 % in 2017 to 5,225 million euros as a result of the variation in operating cash flow (427 million euros), net investing cash flow (619 million euros negative)⁵, and the positive exchange difference.

The net interest-bearing debt/EBITDA ratio declined to 4.10x- (from 4.31x in 2016) and the prospect is that it will continue to decline in the near future. Leverage stood at 132 % (7 basis points less than the previous year).

Reconciliation of net debt 2017

(M€)

(5) Includes non-recurring investment in Infrastructure and Energy.

IMPROVED DEBT PROFILE AND LOWER AVERAGE COST OF DEBT

The cost of debt was reduced again in 2017, by 97 basis points with respect to 2016, to an average of 3.77 %, and the net interest coverage ratio improved significantly, from 3.6x to 5x. The average term of debt declined slightly, to 4.13 years, at the end of 2017.

This reduction in the average cost of debt was driven by ACCIONA's higher capital and liquidity, due mainly to the excellent response to the company's capital market issuance, which also enhanced the company's corporate debt profile.

In 2017, gross corporate debt amounted to 72 % of total gross debt, and non-bank debt increased its share of the total by 10 basis points with respect to 2016, to 33 % of the total. Gross non-bank corporate debt includes 379 million euros in commercial paper, 862 million euros in bonds and 367 million euros in other debt, including ECAs and multilateral agencies.

A number of green loans were arranged in 2017 to finance investments in renewable energy and in environmental sustainability projects⁽⁶⁾:

- 100 million euros loan from BBVA arranged in April 2017 and maturing in 3 years;
- 50 million euros loan from Unicredit arranged in May 2017 and maturing in 2019;
- Two private placements, in June and September, totalling 77 million euros.
- A tap on the November 2016 Schuldschein in the amount of 17 million euros.

GROSS CAPITAL EXPENDITURE AMOUNTED TO 920 MILLION EUROS IN 2017, MAINLY IN THE ENERGY AND INFRASTRUCTURE DIVISIONS

STABLE CAPITAL EXPENDITURE

In line with the projections made the previous year, 2017 was a year of intensive capital expenditure focused essentially on preserving the profitability of the company's portfolio.

Gross capital expenditure amounted to 920 million euros, concentrated in the Energy and Infrastructure divisions.

ACCIONA Energy invested 468 million euros during the year to complete the El Romero Solar photovoltaic plant in Chile and the Bannur wind farm in India, and to initiate construction of new wind farms in Mexico (El Cortijo), Australia (Mt. Gellibrand) and Spain (El Cabrito); it also increased the stake in the Ripley wind farm in Canada from 50 % to 100 %.

ACCIONA Infrastructure invested 359 million euros, notably to acquire Geotech in Australia for 139 million euros in order to accelerate ACCIONA's expansion into the Australian infrastructure market, and also 88 million euros in heavy equipment and installations in the Construction and Industrial divisions worldwide.

Divestments amounted to 201 million euros, including Ruta 160 toll road in Chile (182 million euros) and a tertiary property owned by ACCIONA Inmobiliaria.

Net capital expenditure amounted to 719 million euros, representing 609 million euros in terms of net investing cash flow⁷.

In 2018, ACCIONA plans to maintain gross investment at similar levels to 2017, i.e. around 900 million euros. Capital expenditure will be partly offset with the sale of Trasmediterranea and the CSP business in Spain.

SOCIAL CASH FLOW AND TAX CONTRIBUTION IN 2017

Social cash flow is a way of calculating ACCIONA's impact on, and contribution of value to, society through the cash flows generated by its activity, considering items that represent real cash inflows and outflows and have an impact on stakeholders.

Operating receipts and payments to public administrations, suppliers and employees. Breakdown by region

Region	Operating receipts (%)	Public administrations. Tax contribution (%)	Suppliers (%)	Wages (%)

TOTAL (M€)	7,923 M€	1,160 M€	5,029 M€	979 M€

In 2017, the economic and social contribution made by ACCIONA to public administrations through tax payments totalled 1,160 million euros, of which 545 million euros correspond to taxes paid (47 %) and 615 million euros to taxes collected (53 %).

Taxes paid

- Income tax
- Property tax
- Taxes associated with employment
- Taxes on products and services

Taxes collected

- Income tax
- Taxes associated with employment
- Taxes on products and services

The Group's tax contribution increased by 14.5 % with respect to 2016 and amounted to 5.3 times attributed after-tax profit⁸. This means that, out of every 100 euros of revenues booked by ACCIONA, 16 were paid in taxes, mainly in Spain, Mexico, Poland, Australia, Chile, Brazil and Portugal. Employment-related taxes are the largest single component of the tax contribution.

In line with group policy, ACCIONA continues to enhance reporting so as to improve tax transparency year after year. In addition to providing a breakdown of taxes paid in the main geographies, it also produces the Group's Annual Tax Transparency Report on a voluntary basis⁹.

In 2017, the ACCIONA group undertakings in Australia adopted Australia's Voluntary Tax Transparency Code.
